Conical nozzle with rod and magnet

COD: RICSER0010SPZB

Conical extraction nozzle (H. 120 mm, Ø 48–90 mm) with rod and magnetic base, for the SER201 welding fume purifier. The magnet allows it to be fixed to metal surfaces and the rod holds it in the chosen position, so the nozzle stays close to the welding point and fumes are captured directly at source.

Technical Data

Portable Case-Type Welding Fume Purifier SER201

SER201000000000

Portable welding fume extractor with three-stage filtration: spark-arresting metal pre-filter, cartridge filter with efficiency above 99% and activated carbon filter. Compact and fitted with a handle, the SER201 welding fume purifier extracts and filters fumes directly at the point where they are generated, in occasional MIG/MAG, MMA and TIG welding.
Portable mechanical-filtration purifier for extracting welding fumes directly at source. Compact, with a case-type format and carrying handle, it is designed for occasional use with medium-low pollutant concentrations in MIG/MAG, MIG/MAG Pulse, MMA and TIG processes.
