SAT300 air-cooled suction torch

Sectors Welding,

Applications Fix

Issues Fumes

COD: SAT300000000000

the **SAT** welding fume **suction flashlight** system **from Secureair®** is an effective, cost-effective and alternative solution to traditional solutions.
The **SAT300 model** is a lightweight suction flashlight, ideal for sheet metal processing with 1-1.2mm wire

Insight

Model SAT300 is a lightweight suction flashlight, ideal for sheet metal working with 1-1.2mm wire
The cover (1.20m) of the flashlight tube is leather with Velcro closure.
The current-carrying cable is 16 sq mm in cross-section.
The fume suction hose is made of super flexible polyurethane.
The weight of the flashlight, at 1 m from the ground, is 1.37 kg, and the air flow rate is 103 mc/h with a head of 15.40kPa.
Thanks to the flashlight with built-in fume extraction, operator protection starts directly from the pollutant source.
The flashlight prevents fumes from being dispersed into the 'work environment resulting in difficulties in capturing them, often forcing companies to have large suction systems or plants.
