

Anti-sparking front wall for SBC benches

📌 Sectors

📌 Applications **Fix**

📌 Issues **Fumes**

COD: PARSB0000000000

Anti-rebound front wall for SBC benches, consisting of a suction metal mesh net placed on the front of the bench for operator protection from splinters and sparks from high-speed grinding.

Insight

Suction front panel of adequate thickness in anti-rebound wire mesh to stop sparks and any grinding chips from bouncing off the operator.

Easily removable for maintenance and cleaning.

Compatible with all SBC series benches
