

# CA25 bag with 25 kg virgin granular activated carbon

📌 Sectors **Painting, Laboratories and Medical,**  
**Plant Components,**

📌 Applications **Fix**

📌 Issues **VOC fumes, Odours**

COD: CA25000000000000

Bag containing **25 kg** of new, unregenerated, mineral-dusted **granular activated carbon in cylinders**, selected for the purification of air from volatile organic solvents, VOCs or deodorisation.

## Insight

Granular **activated carbon**, thanks to its large internal active surface area and retention capacity, is particularly suitable for **purifying air from organic solvents**. Ideal for reducing solvents in painting, odors in the catering sector, or organic composting.

They are packaged in a double bag to protect them from moisture and odor adsorption during transport.

**Base resource:** Steam-activated mineral carbon

### Applications:

- Removal of volatile organic compounds from the gas phase
- VOC, BTEX, BTX, VHHHC, VCHC, VFHC
- Air deodorization process

Secureair® granular activated carbons are guaranteed to be virgin and obtained from the activation of highly selected raw materials. Be wary of low-cost activated carbons with reduced durability.
