CA25 bag with 25 kg virgin granular activated carbon

Sectors Painting, Laboratories and Medical, Plant Components,

Applications Fix

Issues VOC fumes, Odours

COD: CA2500000000000

Bag containing **25 kg of** new, unregenerated, mineral-dusted **granular activated carbon in cylinders**, selected for the purification of air from volatile organic solvents, VOCs or deodorisation.

Insight

Granular **activated carbon**, thanks to its large internal active surface area and retention capacity, is particularly suitable for **purifying air from organic solvents.** Ideal for reducing solvents in painting, odors in the catering sector, or organic composting.
They are packaged in a double bag to protect them from moisture and odor adsorption during transport.
Base resource: Steam-activated mineral carbon
Applications:
- Removal of volatile organic compounds from the gas phase
- VOC, BTEX, BTX, VHHC, VCHC, VFHC
- Air deodorization process

Secureair® granular activated carbons are guaranteed to be virgin and obtained from the activation of highly selected raw materials. Be wary of low-cost activated carbons with reduced durability.
