

SEQA1400 High Flow Axial Fan

📌 Sectors **Ventilation,**

📌 Applications **Fix**

📌 Issues **Heat, Fumes**

COD: SEQA140000000000

High-flow axial fans suitable for wall or overhead installation to **create a uniform indoor climate and recirculate air in commercial and industrial buildings, farms, barns, and greenhouses.**

Insight

CONSTRUCTION

- Galvanized steel frame.
- Fans with **variable pitch angle** equipped with blades made of fiberglass-reinforced technopolymer.
- Hubs made of die-cast aluminum.
- Fans dynamically balanced in accordance with **ISO 14694 Grade G6.3**.
- **Nozzle made of technopolymer**, easy to clean and not subject to corrosion.
- **High-efficiency single-phase brushless EC motors**, 220/277V/50-60Hz, IP55, equipped with built-in control electronics and EMC filters, adjustable speed and suitable for S1 continuous duty.

FEATURES AND BENEFITS

- Prevents thermal stress by increasing sensible heat loss by removing the layer of warm air surrounding the occupants' body.
- Forced relief ventilation unit ideal for in-line installation on feed aisles in cattle barns and rest/waiting area.
- No gears and aerodynamic design for absolute quietness.
- No routine maintenance required.
- Frame made entirely of galvanized steel to ensure long service life and strength.
- Angle of fan keying to guarantee maximum performance.
- Eyebolt hooks to simplify suspended installation and inclined mounting.
- Built-in EMC filters to prevent possible electromagnetic interference with other devices.
- Fan suitable for operation in temperatures from -20°C to +50°C.
- Unit is tested in accordance with the latest standards to ensure maximum reliability of electrical safety, performance and sound level data.
- Designed and manufactured in compliance with the Machinery Directive (MD), the Low Voltage Directive (LVD), the Electromagnetic Compatibility Directive (EMC) and Regulation 327/2011 (ErP Directive).
