

Side and top casing for SB benches

📌 Sectors

📌 Applications **Fix**

📌 Issues **Fumes**

COD: CSUSB0000000000

Side and top enclosures for dust containment, compatible with all SB series extraction benches.

Insight

Function: lateral containment of smoke, dust, sparks and noise.

Thanks to the side and top boxing, the suction effectiveness is further increased, because any horizontal air currents are prevented from dispersing fumes and dust produced on the bench into the environment.

The height of the box can be agreed with the technical department when ordering, the standard one is 1200mm above the standard suction bench top.

On request it is possible to install internal LED lighting and front PVC strips to further reduce the front opening.

Dimensions

Code	Dimensions mm
CSUSB0000000010	1000
CSUSB0000000015	1500
CSUSB0000000020	2000
