

# Balanced arm BSMID25

🔧 Sectors **Welding,**

🔧 Applications **Mobile, Fix**

COD: BSMID2500000000

Balanced BSMID25 welding flashlight support arm, complete with wire puller holder and fixing plate.

## Insight

Thanks to its perfect and stable balance, it accompanies the welder in every movement, allowing them to work in the best possible way while ensuring ideal conditions of hygiene, safety, and ergonomics.

The BSMID25 balanced support arm for welding torches eliminates the need for cables, pipes, and extension cords on the floor, making it ideal for any company that wants a single solution to reduce operating and maintenance costs while ensuring full compliance with regulations.

They can be installed on welding machines, on wheeled and stabilized platforms, or fixed to the ground.

Construction: welded steel and powder coated

Contact the technical department to check compatibility or the need for brackets and adapters.

## Technical Data

| Code            | Long arm meters |
|-----------------|-----------------|
| BSMID2500000000 | 2,5             |
