Welding fume extractor with torch and SATC arm

Sectors Welding,

Applications Mobile

Issues Fumes

COD: SATC3A00000000

SATC3A welding fume extractor serving a ready-to-use welding station.

Insight

Features

SATC3A welding fume extractor for use with a ready-to-use welding station, supplied in a kit consisting of:
- Trolley for extractor and wire feeder;
- 1.5 kW single-phase automatic fume extractor complete with 5 filtration stages in class 10 at 98% at 0.3 microns);
- Balanced torch arm (total working range 8-9 m);
- Welding torch with fume extraction (100% duty cycle), length 5 m, 250-300-350 (depending on the welding machine).

Main advantages of this solution:
- Complies with regulations for the physical safety of personnel;
- Improved ergonomics, thanks to the arm which reduces the operator's exposure to biomechanical overload;
- Protection of operator health, as fumes are captured at the torch source before reaching the respiratory zone, ensuring a TLV (Threshold Limit Value) of 1.5-1.8mg/m³;
- Workplace tidiness and safety, with the elimination of floor obstructions (cables, pipes, etc.);
- Economic return on investment thanks to reduced torch maintenance (-60%); Increased arc life (+10/15%) and 20/30% savings in heating per welding station, thanks to the lower amount of air treated compared to traditional extraction systems.
